DETAILED ACTION

1. Applicant's response filed on 04/25/2006 has been fully considered. The previous rejection has been withdrawn in view of Applicant's submission of the requested English translated foreign test standard.

2. Currently, claims 1-6 are pending.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 4. Claims 1-6 are rejected under 35 U.S.C. 102(a) as being anticipated by Galleguillos et al. (US 6,361,768 B1).

Galleguillos discloses an ampholytic copolymer having at least one anionic functional group and at least one cationic functional group (col. 4, line 36). The copolymer has a glass transition temperature of above 50 degree C, and is in a form of a fine powder with submicron particle size (abstract). Submicron particle size is a particle size of less than 1 um, which includes the claimed particle size. The copolymer can be used for paper coating (col. 19, line 2).
